Dear valued customers,

We want to inform you that while we strive to ensure accuracy and precision in our catalog, XO Interiors cannot be held responsible for any typographical errors or technical inaccuracies that may occur. Please note that the product colors may slightly vary due to photographic lighting sources or printing process.

Additionally, as 80% of our products are handmade, differences in dimensions may occur.

OAK AND PINE

Oak and pine are beautiful, natural materials that offer a unique look and feel due to their inherent variations in color, grain pattern, and texture. When it comes to wood color, any naturally occurring variations are allowed. Oak, for example, has its own inherent disparities in color and grain pattern, meaning each piece of oak will have its own distinct variation which can include aspects like small knots, black lines, color differences, and more. No two oak pieces or boards will ever be the same, but these differences are what make oak accents truly special and add to the product's overall character.

Embrace and celebrate the incredible versatility of nature in your home decor with natural materials like oak and pine. Additionally, as with any natural product, small cracks and changes in color over time due to exposure to sunlight are also to be expected. These variations only serve to enhance and reflect the versatility and beauty of the natural materials.

CHAIR LEGS

The chair legs are crafted out of beech wood. It's worth noting that variations in the color, density, or structure of the wood can affect the final finish of the product. It's important to be mindful when comparing beech and oak finishes. While the finishes themselves are similar, there will always be a slight difference in color due to the unique characteristics of each wood type.

HAIRLINE CRACKS

At times, customers may report small hairline cracks near the joints of our furniture. These cracks are often attributed to dryness of the wood, but in reality, they are usually caused by improper handling. Our furniture is assembled and then painted, making the paint susceptible to cracking from impacts such as drops from a height of 10-15 cm or other forms of incorrect handling. To address this issue, we provide a small paint bottle with each piece of furniture so that any cracks can be easily fixed.

SECURITY FIXING BOLTS

To prevent any potential accidents, ensure the safety of your vitrine by securely locking the bolts at the back of the product onto your sideboard. It is crucial that these bolts remain securely locked at all times

ANTIQUE LOOK

It's important to note that this process is done manually, which means that each product may have slight variations that contribute to its individuality.

Every item we sell is marked with our distinctive XO Interiors logo plaque. This plaque serves as a visual stamp of authenticity, illustrating our commitment to excellence and ensuring that our valuable customers receive only the best products. We stand behind our brand and guarantee the quality of each and every item we produce.
